

VIRTUAL PROGRAMMING

TUTORING

Students will review Math and ELA classroom topics, assignments, homework, projects, test preparation, key concepts and other academic tasks provided in the virtual classroom.

CLUBS

Career Exploration – Student will explore options before they have to start deciding on diploma paths in high school. Students will get to explore careers connected to their interests and aptitudes but also practice skills with high levels of carryover in multiple career areas.

Leadership Development and Life Skills- Program sites infuse character education into daily learning through the use of a curriculum that centers on social, ethical and emotional development. The curriculum is a four part course that focuses on the following: anger and conflict management, building leadership qualities, self-esteem and positive support systems and physical and emotional health. The program also includes a drop-out prevention and transition program for all students.

STEM – Students develop critical thinking, increase Science literacy, and become innovators through hands on, exciting activities.
